Linux, ubuntu, Heroku, Apache

Education 🎓

Web Development
Program - 10 Minute
Program Academy

About Me 👤

My name is Mehedi Hasan, a passionate software engineer with 2 years of experience specializing in Python, Django, and full-stack development. I am adept at building robust web applications with a focus on clean, maintainable code. My skills extend to front-end technologies like Bootstrap and HTMX, as well as backend optimization, allowing me to deliver seamless and efficient solutions. I am driven by a love for problem-solving and a commitment to continuously refining my expertise in software development.

Work Experience :

Junior Developer

Muhul Soft Ltd Jhenaidah Dhaka Bangladesh

2022-2024

Led the development of multiple full-stack web applications, optimizing system performance, and ensuring project scalability. Collaborated with cross-functional teams to implement efficient software solutions using Django, Python, and modern front-end technologies. Played a key role in driving code quality and project delivery.

Software Engineer 👨‍💻

TechNova Solutions Dhaka Bangladesh

2022 - 2024

Architected and sustained intricate backend infrastructures for large-scale enterprise applications. Led initiatives in automation and system integration, significantly minimizing manual tasks and boosting operational efficiency. Leveraged cloud platforms and microservices architecture to elevate application performance and ensure seamless scalability.

Junior Developer

Innovative Coders Ltd Khulna Bangladesh

2020 - 2021

Contributed to various client projects, ensuring the delivery of efficient and well-structured code. Collaborated closely with senior developers in identifying and resolving issues, which deepened my understanding of core development practices. Acquired practical experience with front-end frameworks, version control tools, and agile methodologies.

Project 🖥️

Debt

Debts Project Overview

I have successfully completed a comprehensive Web Development program at 10 Minute Program Academy. This program provided in-depth training in modern web technologies, including front-end and back-end development. Through hands-on projects and real-world applications, I gained practical experience in building responsive and dynamic websites, enhancing my skills in full-stack development.

The Debt Tracker project is a comprehensive platform designed to assist individuals and businesses in managing and tracking debts efficiently. Built with a solid Django backend, the platform offers real-time updates, payment tracking tools, and detailed financial summaries. Users can easily monitor outstanding balances, set reminders for due payments, and generate reports. The project emphasizes a user-friendly interface and leverages responsive design to ensure that the platform is accessible on all devices, providing a reliable solution for managing debts effectively and staying financially organized.
